Education:

Texas A&M University | College Station, Texas May 2029
Bachelor of Science in Aerospace Engineering w/ Computer Science Minor
GPA: 4.0

- Involvement: American Institute of Aeronautics and Astronautics member

Experience:

Software Integrator & Implementer May 2026 - Current
KC Landscape LLC

- Architected and implemented a company-wide integration ecosystem using n8n, REST APIs, and Microsoft Graph to synchronize operation, financial, and customer data across Aspire, HubSpot, Quickbooks, & Microsoft Fabric
- Developed algorithms and automated critical financial and production workflows to reduce manual processing, improve data accuracy, and increase employee productivity.
- Engineered a data analytics pipeline in Microsoft Fabric using PySpark and developed Power BI dashboards displaying key performance indicators for historical analysis, performance monitoring, and forecasting.

Projects:

F/A-18C Augmented Reality Cockpit September 2024 - April 2025
Independent Design and Build

- Designed a full-scale F/A-18 cockpit using CAD software, applying mechanical design principles to ensure accurate ergonomics, component placement, and structural integrity.
- Integrated functional gauges, switches, and flight controls with an augmented reality headset to create an immersive and interactive simulation.
- Developed custom mounting and wiring solutions to interface physical hardware with digital systems.
- Built and verified the design by successfully matching the physical cockpit with the virtual world to create a seamless border between the physical and virtual.

RISK python program December 2025
Final Project

- Programmed an A&M-themed, Python-based simulation of the board game *RISK*, including turn logic, combat mechanics, and probability-based outcomes.
- Streamlined game functions by optimizing code structure, reducing redundancy, and improving runtime efficiency.
- Managed project workflow by delegating tasks, tracking progress, and coordinating group meeting times.

Awards & Honors:

Mechanics Physics Scholar April 2026

- Demonstrated exceptional understanding of mechanics concepts by taking a rigorous mechanics examination
- Ranked in the top 1% of all participants in Texas A&M mechanics class

Skills:

- Technical & Design:
  Python, C++, CAD (Fusion 360/Solidworks), Excel, AI prompting, PowerBI, Microsoft Fabric
- Tools & Equipment:
  Hand Tools, Soldering, 3D printing
